

GREAT LAKES WATER QUALITY AGREEMENT LAKEWIDE ACTION & MANAGEMENT PLANS (LAMPS)

The Great Lakes Water Quality Agreement (GLWQA) is a bi-national treaty designed to restore and maintain the chemical, physical, and biological integrity of the Waters of the Great Lakes. Lakewide Management Plans (LAMPs) result from Annex 2 of the 2012 GLWQA to contribute to the achievement of the and Specific Objective of this Agreement by assessing the status of each Great Lake, and by addressing environmental stressors that adversely affect the Waters of the Great Lakes which are best addressed on a lakewide scale through an ecosystem approach. The Lakewide Action and Management Plans are plans of action to assess, restore, protect and monitor the ecosystem health of each Great Lake and its connecting river system.
