

IMPLEMENTING A LAKE ONTARIO LAKEWIDE MANAGEMENT PLAN (LAMP) BIODIVERSITY CONSERVATION STRATEGY

The key elements of the Lake Ontario LaMP's Binational Biodiversity Conservation Strategy are: 1) the integration of action priorities into existing programs and place-based planning activities especially within key watersheds, an activity best done by local governments and organizations and; 2) regional coordination of lakewide scale biodiversity monitoring and restoration activities. This LaMP implementation strategy lists the key recommendations provided in The Beautiful Lake report to be formally adopted by the LaMP.
