

WESTERN LAKE ERIE AREA CONTINGENCY PLAN – COASTAL/INLAND

Through this plan, the City of Toledo collaborates with other local, state and federal agencies to respond to and mitigate any hazardous materials incidents that occur in the city. The plan describes the strategy for a coordinated response to a discharge or substantial threat of discharge of oil, a release of a hazardous substance from a vessel, offshore facility, or onshore facility operating within the boundaries of the coastal and inland area of Western Lake Erie.
